Why does my campaign’s header and/or URL look different?

Campaign FAQ · https://connectionpoint.com/help/docs/why-am-i-seeing-a-different-logo-in-my-header-than-fundrazr-crowdfundr-cocopay/

Sometimes, you will see a different logo in the header or even a different domain in the URL. ConnectionPoint allows organizations to customize their header in our platforms, and some we have partnered with to allow white-labelled use.

This means you might be signing up for a campaign or an organization under another company with its domain address. Some options may be slightly different based on certain permissions as dictated by these partners; however, the functionality is the same, and our help articles apply to all.

If you are an organization and want to see how to customize your header, click here.

Custom URLs are only available to our Enterprise partners. If you'd like to inquire about this, contact us at support@connectionpoint.com.
