All about your user profile

General User Account Information · https://connectionpoint.com/help/docs/all-about-your-user-profile/

Your user profile is a page personal to your user account, where you can view and change settings to your account and show off your activity on whichever platform you're using.

You can put whatever information you like in your profile. For campaign owners, this is particularly important in trust and transparency - show your supporters who you are but including pictures and video and links to webpages and social media.

Anyone who clicks on your user name, whether it's through a campaign you own or have contributed to, can view your profile.
